

ANSWER Pro Ceramic Bottom Bracket

Required Tools:

- Grease
- 16 Notch Bottom Bracket Tool or Equivalent

Instructions:

- 1 Grease threads of bottom bracket cups and bottom bracket shell generously.
- 2 The cups are indicated with an "R" and "L" for right or left side of frame. Using your hands, carefully thread the "R" cup into the drive side of the frame's bottom bracket shell all the way, or as much as possible. Repeat with the "L" cup on the non-drive side.
- 3 Using a 16 notch bottom bracket tool or equivalent, tighten both sides extremely snug.
- 4 Please ensure tightness of both cups while performing your regular bike maintenance.
