

# ANSWER Pro Chain Tensioners

## Required Tools:

- 5mm Allen Wrench
- 10mm Wrench

## Instructions:

- 1 Slide axle bolt through desired hole in each chain tensioner, through frame and into hub.
- 2 Using a 5mm Allen wrench, adjust each chain tensioner until optimal tension is achieved.
- 3 After properly tightening your hub axle bolts, tighten up the lock nuts on the tensioners using a 10mm wrench.
- 4 Please ensure tightness of all bolts and screws while performing your regular bike maintenance.
