

ANSWER Standard Headsets

Required Tools:

- Headset Press
- Crown Race Installer
- Grease

Instructions:

1. Remove the bearings from the headset cups.
2. Generously grease outside of headset cups as well as the inside of the head tube on the frame.
3. Using a headset press, gently press headset cups into frame until flush the top and bottom of the head tube.
4. Using a headset race installer, hammer the headset race onto the crown of the steer tube on your fork until race is completely flat onto the crown area.
5. Reassemble headset bearings and install fork.
